SECTION 1

Getting Started & Portal Overview

What is this portal?

The Digital Land Record Portal (EODB — Ease of Doing Business, Haryana) provides citizens, farmers, and businesses with real-time access to cadastral maps, Khasra records, and ownership details across all 22 districts of Haryana.

🔍

Search Land Records

Find any parcel by Khasra number, Khewat number, owner name, village, tehsil or district.

🗺️

Interactive Cadastral Map

Powered by HARSAC MapServer — zoom, pan, and click any parcel to view live land data.

📏

Measurement Tools

Measure distances in metres, kilometres, feet and karam; areas in hectares, acres and square metres.

🖨

Print & Export

Print a formatted land information report directly from the portal with map context.

SECTION 2

Searching Land Records

The sidebar Search panel provides three search modes. Open it by clicking **Search Land Record** in the left sidebar.

Search Mode	What You Need	Result
KHASRA SEARCH	District → Tehsil → Village → Murabba → Khasra No.	Owner names, Khewat, Khatoni, area & record type
KHEWAT SEARCH	District → Tehsil → Village → Khewat No.	All Khasra numbers linked to that Khewat and owners
JAMABANDI NAKAL	District → Tehsil → Village → Khewat → Khatoni	Certified Jamabandi record (Nakal) with Jamabandi year

STEP-BY-STEP: KHASRA SEARCH

1. Click **Search Land Record** in the left sidebar to expand the search drawer.
2. Select the **Search Owners by Khasra** tab.
3. Choose **District** from the dropdown — all 22 Haryana districts are available.
4. Select **Tehsil** (auto-populated based on district).
5. Select **Village** and then **Murabba** .
6. Choose the **Khasra** number. Owner details and record type appear instantly.
7. Click **PRINT** to generate a formatted land information report.

💡 You can also use the **top search bar** to quickly search any district, tehsil, or village by name — the map will automatically highlight and zoom to the matching boundary.

SECTION 3

Understanding the Map

Action	How To
Zoom in	Scroll up on the map, or click `+` on the right toolbar
Zoom out	Scroll down on the map, or click `−` on the right toolbar
Pan (move map)	Click and drag anywhere on the map
Reset to full Haryana view	Click the **Reset Extent** button on the right toolbar
Find my location	Click **Locate Me** on the right toolbar — allow browser location access
View parcel details	Click any highlighted Khasra parcel on the map
Highlight a district / tehsil boundary	Type the name in the top search bar and press Enter

Disclaimer: All revenue information displayed on these maps is based on data provided by the Haryana Revenue Department. HARSAC is not responsible for any discrepancy. This information is for viewing purposes only and is not intended for use in court proceedings. Map scale: 1:10,000.

SECTION 4

Map Layers & Basemaps

Open the **Map Layers** panel from the sidebar or the right toolbar to toggle individual data layers.

Layer	Category	Default	Description
Cadastral	CADASTRAL	ON	Khasra parcel boundaries for all districts (sublayers 1–22)
District Boundaries	BOUNDARIES	ON	22 administrative district outlines
Tehsil Boundaries	BOUNDARIES	ON	Tehsil-level administrative boundaries
Village Boundaries	BOUNDARIES	ON	Revenue village outlines
Government Assets	OVERLAYS	OFF	Government land parcels — toggle to view
NHAI Upcoming Roads	OVERLAYS	OFF	Planned national highway alignments
HR Road Infrastructure	OVERLAYS	OFF	Haryana state road network

BASEMAP OPTIONS

Choose the background map style from the Basemap panel (right toolbar):

Basemap	Best For
Cadastral (Default)	Revenue mapping and official land record workflows
Satellite Imagery	Ground-truth verification and site inspection
Topographic	Terrain analysis and elevation reference
Street Map	Navigation and address-based lookup
Dark	Low-light environments and presentation mode

SECTION 5

Measurement Tools

Open from **Measurement Tools** in the sidebar or the right toolbar button.

MEASURE DISTANCE

1. Click **Measure Distance** in the Measurement panel.
2. Click on the map to place your first point.
3. Continue clicking to add intermediate waypoints.
4. **Double-click** to finish — the total geodesic distance is displayed.
5. Results are shown in: **Metres · Feet · Karam · Kilometres**

MEASURE AREA

1. Click **Measure Area** in the Measurement panel.
2. Click on the map to place polygon vertices.
3. **Double-click** to close the polygon — area is calculated instantly.
4. Results are shown in: **Square Metres · Hectares · Acres**

💡 Click **Clear Measurement** to reset and draw again. Close the panel to exit measurement mode completely.

SECTION 6

Selecting & Comparing Multiple Parcels

Use **Personalizations** → **Select Features** to draw a shape on the map and select up to **20 Khasra parcels** simultaneously.

Tool	How to Draw	Best Use
Rectangle	Click and drag to draw a rectangle	Block or grid-aligned parcels
Polygon	Click to place vertices, double-click to close	Irregular land holdings
Polyline	Click to trace a line, double-click to finish	Road/canal corridor parcels

Selected parcels appear in the bottom information table. Click **Clear** to deselect all and draw again.

SECTION 7

Printing Land Records

1. Search for the desired parcel using the **Search Land Record** sidebar panel.
2. Review the land information details in the bottom table or the details modal.
3. Click the **PRINT** button (top of the search panel or bottom table toolbar).
4. The map automatically zooms to the selected parcel and the browser print dialog opens.
5. Choose your printer or **Save as PDF** to export a digital copy.
6. After printing, the map view is automatically restored to its previous state.

💡 For best print quality, use **A4 portrait** paper size and enable **Background graphics** in the print dialog.

SECTION 8

Login & Access

Login Type	Who Uses It	How
OTP LOGIN	Citizens & general public	Enter registered 10-digit mobile number → receive OTP → verify
ADMIN LOGIN	Revenue officials & HARSAC staff	Enter Admin ID and password → click Admin Login
GOOGLE LOGIN	Citizens with Google account	Click *Login with Google* and authenticate via Google

Session Security: Your session is secured with token-based authentication. Always click **Logout** (top-right menu) before leaving a shared computer.

SECTION 9

Frequently Asked Questions

Q1 The map is not loading. What should I do?

Check your internet connection — the cadastral map requires a stable connection to the HARSAC MapServer. Refresh the page (F5). If the issue persists, try clearing your browser cache or opening the portal in a different browser (Chrome or Edge recommended). Make sure you are not behind a firewall that blocks ArcGIS MapServer URLs.

Q2 I cannot find my village in the search dropdown. Why?

Ensure you have selected the correct District and Tehsil first — the Village dropdown is filtered accordingly. If the village is still missing, the record may not yet be digitised for that revenue circle. Contact your local Tehsil office or the HARSAC helpdesk (details in Section 11).

Q3 The owner name shown is incorrect. Can I dispute it here?

No. The data displayed is sourced directly from the Haryana Revenue Department records. This portal is for **viewing purposes only** and is not to be used for any court dispute. To correct ownership details, contact your local Patwari or the Revenue Court (Tehsildar) with supporting documents.

Q4 Can I download or save the Khasra details?

You can print the land information report using the **PRINT** button, which also allows you to *Save as PDF* from the browser's print dialog. A dedicated download/export feature is planned in a future release.

Q5 I am not receiving the OTP on my mobile number.

1) Verify the mobile number is registered with the Revenue Department. 2) Check that your phone has signal and is not in DND (Do Not Disturb) mode. 3) Wait 60 seconds before requesting a new OTP. 4) If the problem continues, contact the helpdesk at the number in Section 11.

Q6 What does Murabba mean, and how is a Khasra different?

A **Murabba** is a larger cadastral block (typically ~25 acres) used to organise Khasra numbers within a village. A **Khasra** is an individual plot of land within a Murabba. Every parcel in Haryana has a unique Khasra number within its village-Murabba combination. See Section 10 (Glossary) for more terms.

Q7 What is the maximum number of parcels I can select at once?

You can select a maximum of **20 Khasra parcels** in a single selection using the Rectangle, Polygon, or Polyline tools under Personalizations → Select Features.

Q8 The portal is in English. Can I switch to Hindi?

Yes. Click the **language toggle** button in the top-right header area to switch between English (EN) and Hindi (हिंदी). All labels, navigation, and panel text will update immediately.

Q9 Is the data on this portal legally valid for property transactions?

No. The information displayed is for reference and viewing purposes only. For any legal property transaction, mutation, or dispute, you must obtain certified records from the Revenue Department (Patwari / Tehsil office). Always verify with official sources before proceeding.

Q10 Which browsers are supported?

The portal is optimised for **Google Chrome** (recommended) and **Microsoft Edge**. It is compatible with Firefox and Safari, but some map interactions may perform differently. Internet Explorer is not supported.

SECTION 10

Glossary of Key Terms

Term	Meaning
Khasra	A unique plot of agricultural or revenue land. Each Khasra has a number within a village-Murabba.
Murabba	A cadastral block (~25 acres) that groups Khasra plots within a village for administrative purposes.
Khewat	An ownership account number that links multiple Khasra parcels to the same owner(s).
Khatoni	A cultivation/possession account showing which person is cultivating or occupying each Khasra.
Jamabandi	The periodic register of land ownership and cultivation rights, updated every 4–5 years. It is the primary legal land record.
Nakal	A certified copy of the Jamabandi or other revenue record issued by the Revenue Department.
Patwari	The village-level revenue official responsible for maintaining land records and measurement.
Tehsil	A sub-district administrative unit. Haryana has 93 tehsils across 22 districts.
Cadastral Map	A large-scale map showing the boundaries and ownership of individual land parcels.
Geodesic	A measurement that accounts for the curvature of the Earth — used for accurate area and distance on the map.
Karam	Traditional unit of length used in Punjab/Haryana revenue measurement. 1 Karam = ~0.549 metres (approximately 21.6 inches).
HARSAC	Haryana Space Applications Centre — the state organisation responsible for geospatial data, cadastral mapping, and this portal.
Mutation	The process of updating land ownership records in the official Jamabandi after a sale, inheritance, or court order.
Record Type	Classification of the parcel — e.g., Agricultural, Residential, Commercial, Government.

For a comprehensive reference of cadastral terminology, download the **Cadastral Terminology PDF** from the sidebar (*Cadastral Terminology* menu item).
